PROFESSIONAL SUMMARY

IT professional with 5+ years of cross-functional experience across frontend engineering, enterprise application maintenance, and on-premise infrastructure supervision. Currently overseeing system stability, database performance, and legacy application support in a national-scale operational environment. My technical background covers production Next.js/TypeScript platforms, automated test coverage, and CI/CD tooling, and it sits alongside hands-on operational leadership: coordinating cross-team issue resolution, enforcing uptime standards, and driving technology modernisation initiatives that increased team delivery velocity by 50%. Ready to apply that combination to protect and scale the IT operations of a growing organisation.

CORE COMPETENCIES

Infrastructure & Ops: On-Premise Server Management · Microsoft SQL Server / SSMS · Database Monitoring & Validation · Docker · Portainer · Firebase · MySQL

IT Leadership: Team Coordination & SLA Ownership · Incident Escalation & Resolution · Legacy System Support (Delphi) · Operational Process Enforcement

Application Development: React.js / Next.js · TypeScript · Node.js / Express.js · REST API · React Query · Redux · PHP / Laravel

Quality & Delivery: Jest (Unit Testing) · Cypress (E2E Testing) · Storybook · Git · Jira / Trello · Agile / Scrum

Web & CMS: WordPress / WooCommerce · Elementor · SEO · HTML5 / CSS3 / SASS · Vue.js

PROFESSIONAL EXPERIENCE

KREASI SENTOSA ABADI · Jakarta, Indonesia *Jan 2026 – Present*

Supervisor Infrastructure & Operational (Contract)

- Own day-to-day operational system stability; define escalation procedures and hold the team accountable to incident resolution timelines.
- Monitor database health and application performance indicators, identifying and resolving anomalies before they impact business continuity.
- Maintain critical legacy business applications built in Delphi, sustaining zero unplanned downtime for operational end users.
- Execute controlled data integrity audits and updates via Microsoft SQL Server and SSMS, improving report accuracy and reducing erroneous records.

VISI PRIMA NUSANTARA · Jakarta, Indonesia *Dec 2021 – Sep 2025*

Frontend Developer (Full-Time)

- Architected and delivered three EdTech platforms (Portal Sekolah, Portal Kerja, and Portal Kampus) using Next.js, TypeScript, and SCSS, serving thousands of daily active users.
- Led technical migration from JavaScript to TypeScript and from multi-repo to monorepo structure, significantly reducing cross-team dependency conflicts.
- Introduced AI-assisted development tooling (CursorAI, GitHub Copilot, Coderabbit, BuilderIO), increasing team delivery velocity by 50%, as validated through sprint retrospective data.
- Established the team's first automated testing suite: Jest for unit tests and Cypress for E2E coverage, reducing post-release regression hotfixes.
- Collaborated directly with backend and QA leads across time zones, owning UI/API contract definition and maintaining consistent release cadence.

MANASHAKTI · United Kingdom (Remote) Nov 2025 – Jan 2026

Frontend Developer & UI/UX (Internship)

- Integrated ElevenLabs voice AI and Gemini LLM into a live web platform, delivering AI-driven features end-to-end within a 3-month engagement.
- Designed and implemented mobile app screens in Figma and React Native, bridging design and engineering without a handoff gap.

KINGDOM TECHNOLOGY · Australia (Remote) Sep 2024 – Jun 2025

Frontend Developer (Internship)

- Built an AI-integrated social media platform in Next.js, wiring together Clerk (auth), Stripe (payments), LiveKit (real-time video), and Groq/Gemini AI.
- Implemented N8N automation workflows, reducing manual admin tasks and enabling event-driven feature triggers without custom backend code.

LEARNFICTION · Germany (Remote) Jul – Sep 2024

Frontend Developer (Internship)

- Developed a PDF text-annotation tool using Angular.js; managed containerised deployment via Portainer and Remote Desktop Connection.

INDO MENARA DIGITAL · Indonesia Jan – Dec 2021

Web Developer (Full-Time)

- Delivered in-house and client-facing websites using WordPress and Vue.js; handled full-stack IT hardware and software support across the company.
- Executed email-blast campaigns for multiple clients, managing list segmentation and delivery scheduling.

CHAMELEON · Indonesia Oct 2020 – Jan 2021

Junior Frontend Developer (Contract)

- Built an internal company website using WordPress, Vanilla JS, and Vue.js within a 4-month contract engagement.

EDUCATION

University of Lampung GPA: 3.53 / 4.00

Bachelor of Informatics · 2015 – 2019
